Assessment

The Defaqto methodology involves using both quantitative and qualitative inputs to risk rate a portfolio:

Input 1 - Forecast the portfolio's future volatility

Input 2 - Discussion with the portfolio manager

Since our profiles are overlapping and not contiguous, we have some discretion as to whether a portfolio is rated in the upper or the lower profile.

Our assessment has been considered by our Investment Committee, and has taken into account some of Clever's suggestions when arriving at our Risk Ratings.
